Office Action Summary

Application No.

09/892,629

Applicant(s)

KITCHEN ET AL.

Examiner

Raquel Alvarez

Art Unit

3622

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 34-52 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 34-52 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. This office action is in response to communication filed on 4/29/2005.
2. Claims 34-52 are presented for examination.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 34-41 and 49-52 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As an initial matter, the United States Constitution under Art. I, §8, cl. 8 gave Congress the power to "[p]romote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries". In carrying out this power, Congress authorized under 35 U.S.C. §101 a grant of a patent to "[w]hoever invents or discovers any new and useful process, machine, manufacture, or composition or matter, or any new and useful improvement thereof." Therefore, a fundamental premise is that a patent is a statutorily created vehicle for Congress to confer an exclusive right to the inventors for "inventions" that promote the progress of "science and the useful arts". The phrase "technological arts" has been created and used by the courts to offer another view of the term "useful arts". See *In re Musgrave*, 167 USPQ (BNA) 280 (CCPA 1970). Hence, the first test of whether an invention is eligible for a patent is to determine if the invention is within the "technological arts".

Further, despite the express language of §101, several judicially created exceptions have been established to exclude certain subject matter as being patentable subject matter covered by §101. These exceptions include "laws of nature", "natural phenomena", and "abstract ideas". See *Diamond v. Diehr*, 450, U.S. 175, 185, 209 USPQ (BNA) 1, 7 (1981). However, courts have found that even if an invention incorporates abstract ideas, such as mathematical algorithms, the invention may nevertheless be statutory subject matter if the invention as a whole produces a "useful, concrete and tangible result." See *State Street Bank & Trust Co. v. Signature Financial Group, Inc.* 149 F.3d 1368, 1973, 47 USPQ2d (BNA) 1596 (Fed. Cir. 1998).

This "two prong" test was evident when the Court of Customs and Patent Appeals (CCPA) decided an appeal from the Board of Patent Appeals and Interferences (BPAI). See *In re Toma*, 197 USPQ (BNA) 852 (CCPA 1978). In *Toma*, the court held that the recited mathematical algorithm did not render the claim as a whole non-statutory using the Freeman-Walter-Abele test as applied to *Gottschalk v. Benson*, 409 U.S. 63, 175 USPQ (BNA) 673 (1972). Additionally, the court decided separately on the issue of the "technological arts". The court developed a "technological arts" analysis:

The "technological" or "useful" arts inquiry must focus on whether the claimed subject matter...is statutory, not on whether the product of the claimed subject matter...is statutory, not on whether the prior art which the claimed subject matter purports to replace...is statutory, and not on whether the claimed subject matter is presently perceived to be an improvement over the prior art, e.g., whether it "enhances" the operation of a machine. *In re Toma* at 857.

In *Toma*, the claimed invention was a computer program for translating a source human language (e.g., Russian) into a target human language (e.g., English). The court found

Art Unit: 3622

that the claimed computer implemented process was within the "technological art" because the claimed invention was an operation being performed by a computer within a computer.

The decision in *State Street Bank & Trust Co. v. Signature Financial Group, Inc.* never addressed this prong of the test. In *State Street Bank & Trust Co.*, the court found that the "mathematical exception" using the Freeman-Walter-Abele test has little, if any, application to determining the presence of statutory subject matter but rather, statutory subject matter should be based on whether the operation produces a "useful, concrete and tangible result". See *State Street Bank & Trust Co.* at 1374. Furthermore, the court found that there was no "business method exception" since the court decisions that purported to create such exceptions were based on novelty or lack of enablement issues and not on statutory grounds. Therefore, the court held that "[w]hether the patent's claims are too broad to be patentable is not to be judged under §101, but rather under §§102, 103 and 112." See *State Street Bank & Trust Co.* at 1377. Both of these analysis goes towards whether the claimed invention is non-statutory because of the presence of an abstract idea. Indeed, *State Street* abolished the Freeman-Walter-Abele test used in *Toma*. However, *State Street* never addressed the second part of the analysis, i.e., the "technological arts" test established in *Toma* because the invention in *State Street* (i.e., a computerized system for determining the year-end income, expense, and capital gain or loss for the portfolio) was already determined to be within the technological arts under the *Toma* test. This dichotomy has been recently acknowledged by the Board of Patent Appeals and Interferences (BPAI) in affirming a

§101 rejection finding the claimed invention to be non-statutory. See *Ex parte Bowman*, 61 USPQ2d (BNA) 1669 (BdPatApp&Int 2001).

In the present application, independent claims 34 and 49 clearly recite "useful, concrete and tangible results" ("presenting billing information"), however the claim recites no structural limitations (i.e., computer implementation), and so it fails the first prong of the test (technological arts).

The claims can be performed "by hand" or "manually with paper records" therefore it fails to pass the first prong technological arts test and therefore recites non-statutory subject matter under 35 USC 101.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Regarding claim 51, the claim recites for activation by the user but the activation by the user never takes place. The claim does not positively recite the authorization of the payment by the user. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3622

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 34-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hogan (5,699,528 hereinafter Hogan).

With respect to claims 34, 36-37, 42, 44-45 and 49, Hogan teaches a process for generating a user authorization of payment of electronically presented bills (Figure 11). Displaying information corresponding to a plurality of bills for a single user on a single screen, including information representing a second bill (figure 10); receiving user input including a selection of at least one of the first bill information and the second bill information and authorization of payment (Figures 2B and 10-11).

With respect to generating a single message authorizing payment of the at least one of the first bill and the second bill represented by the selected information based on the received user input. Hogan teaches individually selecting authorization of payment of the respective bills to a payment service provider (see figure 2B). Hogan does not specifically teach a single message authorizing the payment of the first and second bill. Official notice is taken that it is old and well known in bill consolidation to authorize the payment of more than one bill at the same time in order to save transaction time. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included a single message authorizing the payment of the first and second bill in order to obtain the above mentioned advantage.

With respect to claims 35, 43 and 50 Hogan further recites that the displayed information includes information representing a third bill (See Figure 10); the received user input selects only the first bill information and the second bill information (i.e. the

Art Unit: 3622

user selects/highlights the bill that he or she wants to pay)(Figure 10). Hogan teaches individually selecting authorization of payment of the respective bills (see figure 2B).

Hogan does not specifically teach a single message authorizing the payment of the first and second bill. Official notice is taken that it is old and well known in bill consolidation to authorize the payment of more than one bill at the same time in order to save transaction time. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included a single message authorizing the payment of the first and second bill in order to obtain the above mentioned advantage.

With respect to claims 38-39, Hogan further teaches that the user input authorizing payment authorizes payment of full payment amount and minimum payment amount (see Figure 4, item 411).

With respect to claim 40-41, 47-48, 52 the claims further recite the plurality of bills are of a particular type and the received user input includes a selection of the selected type (i.e. the display bills include the type of bills, i.e. electric company, etc. and the user clicks on the type of bill to make his or her selection)(Figure 10).

Claims 46 and 51 further recite one payment authorization indicator to authorize the payment if a full amount (i.e. a user checks on the full amount indicator to make a payment for the full amount); and a second payment authorization indicator that can be activated by the user to authorize the payment of a minimum payment amount (i.e. the user checks on the allowed partial indicator to make authorize minimum payment (see Figure 4, item 411)).

Response to Arguments

6. With respect to the 101 rejection, the Examiner wants to point out that the body of the claims do not recite any computer or device that would allow to analyze or calculate the bills. Therefore, the 101 rejection has been sustained.

7. The double patenting rejections pertaining to co-pending Application number 09/795,314 has been withdrawn.

8. The double patenting pertaining to Patent Number 6,289,322, has been withdrawn.

9. The 112, 2nd pertaining to claim 51 has been maintained because the claims there is no user input to authorize the payment.

10. Applicant argues that Hogan does not present all the information on a single screen. The Examiner wants to point out that a single screen is quite different than a single window. A computer monitor contain a single screen but can display various windows or pages on the same screen. In the case of Hogan, the user is using one computer screen to display various billing information on the same computer screen and therefore it meets the claimed invention, because in Hogan all the billing information is displayed on the user's computer screen, which is only one computer screen

11. With regard to the examiner's use of Official Notice, since, Applicant didn't command a response or request of such personal knowledge such as to provide a proper challenge that would at least cast reasonable doubt on the fact taken notice of, the Official notice is sustained. See MPEP 2144.03 where In re Boon is mentioned.

12. Appellant argues that Hogan does not teach a full payment amount authorization or a minimum payment authorization. Hogan teaches on Figure 4 and 11 "total amount now due", In the case of Figure 4, the \$114.43 is the full amount due on the account. The allowed, pre-established partial amounts allow the payor to break into payment the \$114.43 amount. The \$114.43 or the established allowed partial payments are the payment amounts due on the account. Therefore Hogan clearly teaches authorizing the full payment or in the case of partial payments, a pre-established partial payment which is lower than the full amount.

13. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the bills to be displayed to be of the same type) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

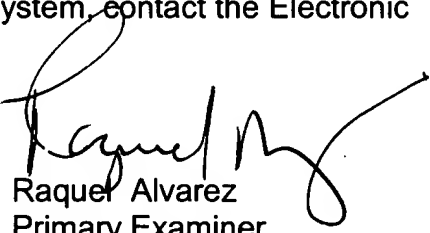

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Point of contact

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raquel Alvarez whose telephone number is (571)272-6715. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric w. Stamber can be reached on (571)272-6724. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
